
CONFIDENTIAL · ACQUISITION PROPOSAL

Jollof Living

Luxury Living, African Soul

Proposal for the acquisition of

90% of the company

Cash consideration equal to 50% of Year-5 worth · Founders retain 10%
September 2026 · Naira figures · USD at ₦1,600 · Anchored to the investor projections

Not an offer to sell securities. Subject to due diligence, SPA and board approval.

Deal at a glance

Anchored to the base-case Year-5 enterprise value in the September 2026 projections pack.

Jollof Living invites a single strategic or financial buyer to acquire a controlling interest now, priced as a deliberate discount to the platform the buyer would otherwise have to build by 2031. The headline Year-5 worth is 10× Year-5 EBITDA on the management case: ₦15.1bn × 10 = ₦151bn (≈ US$94m). This proposal asks for half of that worth in cash at closing, while the founding shareholders retain a 10% fully diluted stake that rides with the buyer to Year 5 and beyond.

YEAR-5 WORTH (BASE)
₦151bn
US$94m · 10× Y5 EBITDA

CASH AT CLOSE (50%)
₦75.5bn
US$47.2m · for 90% of equity

FOUNDERS RETAIN
10%
Fully diluted · no preference

Implied pricing

	₦	US$
Year-5 EV (10× ₦15.1bn EBITDA)	151bn	$94.4m
Cash consideration (50% of Y5 EV)	75.5bn	$47.2m
Equity acquired by buyer	90%	90%
Implied 100% equity value at close	83.9bn	$52.4m
Founders’ 10% at close (mark)	8.4bn	$5.2m
Founders’ 10% if Y5 EV is delivered	15.1bn	$9.4m
Founders’ total if Y5 hits (cash + roll)	90.6bn	$56.6m
Buyer’s 90% if Y5 hits	136bn	$85.0m

In words: the buyer pays US$47.2m today for 90% of a luxury Nigerian short-stay marketplace, implying a US$52.4m company today — about 0.56× the Year-5 target EV. If the plan is delivered, that 90% is worth ~US$85m in 2031, a ~1.8× cash-on-cash on the equity stub before dividends or take-private optionality. The 4× GMV lens (Y5 GMV US$78m → EV ~US$311m) is shown later as a ceiling, not the ask.

How the 90 / 10 split works

Share purchase, not an asset sale.
Buyer acquires 90% of the issued share capital of the operating company (and any HoldCo) for cash. IP, brand, codebase, domain, customer contracts and escrow arrangements transfer with the shares.

Cash is 50% of Year-5 worth.
₦75.5bn / US$47.2m, payable 90% at closing and 10% at 12 months subject only to customary leakage (no EBITDA earn-out). We are not asking the buyer to underwrite the full Year-5 plan in cash.

Founders retain 10%, pari passu.
Ordinary shares, no preference, tag and drag, pro-rata on a sale. Lock-up 36 months except for a permitted 2% liquidity window after Year 2. Two board seats for the buyer, one for founders, one independent.

Management stay.
Founders and named operators enter 3-year employment / consulting agreements with non-compete in luxury short-stay in Nigeria, Ghana, Côte d’Ivoire and Kenya. Acceleration of the rolled 10% only on change of control.

Currency.
Consideration may be paid in USD or NGN at the CBN/IE window rate on the locked date. The ₦1,600 planning rate is for this memo only.

Exclusivity.
45 days from countersignature of a term sheet, extendable 15 days if SPA is in advanced draft. Break fee 1.5% of cash consideration if buyer walks without a MAC.

Conditions: confirmatory legal, tax, IP and product due diligence; live payments/escrow going live or a funded plan to do so within 90 days of close; no undisclosed related-party debt; ordinary CAMA and (if triggered) FCCPC merger notification. This document is a proposal, not a prospectus.

From the projections pack to this price

Same supply targets: 500 homes in Y3, 2,200 in Y5, 4,500 in Y10.

	Y3 2029	Y5 2031	Y10 2036
Live listings	500	2,200	4,500
GMV	₦23.2bn	₦124.5bn	₦348bn
Net revenue	₦4.65bn	₦25.9bn	₦76.0bn
EBITDA	₦1.60bn	₦15.1bn	₦31.5bn
EV at 10× EBITDA	₦16bn	₦151bn	₦315bn
EV (US$m)	~$10m	~$94m	~$197m

The ask uses only the Year-5 column, and only the 10× EBITDA method — the same method the projections pack described as the better lens once the marketplace is profitable. We do not price this deal off Year-10 GMV, off 4× GMV, or off Transcorp's hotel multiple. Those belong in the comps chapter as context.

Why 50% of Year-5 — not 100%, not a seed round

Paying 100% of Year-5 EV today would ask the buyer to fund execution risk in cash. Paying a typical seed/Series A valuation would ignore that the product, fee stack (12% host / 8% guest), brand and codebase already exist. Fifty percent of the 2031 worth, for 90% of the equity, splits the execution risk: the buyer owns the upside above US$52m; the founders stay aligned through a 10% roll that is only valuable if Year-5 is delivered.

On a conservative Year-5 (₦4.2bn EBITDA → ₦42bn EV), 50% would be ₦21bn (~US$13m) for 90%. We are not offering that price. The proposal is the management case. If diligence cannot support 2,200 verified homes and 60% occupancy, the parties can re-cut along the conservative column — that is a negotiation, not this paper.

Mostly Nigerian-owned hospitality & travel

Public marks where they exist. Private marks are last-round or informed estimates, not offers.

There is no listed luxury short-stay marketplace in Nigeria. Comps therefore split into (A) Nigerian-owned hotel owner-operators, which own bricks and trade at asset multiples, and (B) Nigerian-owned digital travel / lodging platforms, which are closer in model but thinner in public data. Airbnb and Booking.com set guest behaviour but are not Nigerian-owned and are omitted from the value table.

Company	Model	Ownership	Current mark
Transcorp Hotels	Owned hotels + Aura OTAs	NGX:TRANSCOHOT	₦2.29tn · ~$1.4bn
Ikeja Hotel Plc	Owned hotels (Sheraton etc.)	NGX listed, Nigerian	Assets ₦82bn (H1'26)
Hotels.ng	Hotel + short-let OTA	Nigerian, VC-backed	Raised ~$11.7m · last rumoured ~$4–15m
Wakanow	OTA (flights, hotels)	Nigerian, 2008	Reported $40m raised
Travelbeta	OTA (flights-led)	Nigerian	$2m seed (2015)
NestFlow	Hotel ops software	Nigerian, bootstrapped	₦14m early contracts (2026)
Jollof Living (this ask)	Luxury short-stay marketplace	Nigerian, product live	Implied $52m at close

How to read the table

Transcorp Hotels is the cleanest Nigerian public mark: market cap ₦2.29 trillion as of 11 June 2026, TTM revenue ~₦99bn, P/E ~102. It is an owner of Hilton Abuja and Calabar plus the Aura booking layer — not a zero-inventory marketplace. Its EV is 15×+ Jollof's Year-5 EV and ~24× this proposal's implied close value. It shows what Nigerian capital will pay for trusted hospitality cash flows, not what a 2,200-key marketplace should trade at today.

Ikeja Hotel Plc is the other listed Nigerian hotel name. Combined with Transcorp it posted ₦14.6bn PAT in H1 2026 on >₦57bn turnover. Again, rooms on the balance sheet. Jollof's Year-5 EBITDA (₦15.1bn) is in the same order of magnitude as Transcorp's H1 PAT run-rate — with no hotels owned.

Hotels.ng (Mark Essien) is the closest Nigerian-owned digital lodging brand: 13,000+ hotels and short-lets, Spark / EchoVC / Omidyar capital, ~$11.7m raised. Historical commentary put it near $4m; later funding implies a higher but still sub-$50m private mark. It is mass and hotel-led. Jollof is luxury, escrow-led, and fee-rich (20% of lodging vs a typical OTA 10–15%).

Wakanow is Nigeria's scaled OTA (flights-heavy). Third-party databases cite ~$40m raised and wide revenue bands; treat those as unverified. It competes for the travel session, not for verified Ikoyi penthouses.

Travelbeta's $2m Nigerian seed (2015) is a reminder that OTAs in this market have historically been financed as SMEs, not as category marketplaces.

Lagos short-let GMV itself is large: Edala's 2025 report put the Lagos market near ₦281–286bn, with Island ADR high enough that a 2,200-home luxury slice is plausible without inventing demand. Jollof does not need to win mass mainland supply.

Why this is not Transcorp, and not Hotels.ng

	Transcorp Hotels	Hotels.ng / OTAs	Jollof Living
Inventory	Owned keys	Aggregated hotels	Verified private homes
Capex	Heavy (buildings)	Light	Light (photo, KYC)
Take / margin	Hotel GOP	OTA commission	12% + 8% coded
Trust mechanic	Brand + staff	Reviews	Escrow + KYC + inspect
ADR band	5-star hotel	Budget → mid	₦145k–₦420k+
Guest	Corporate + leisure	Mass domestic	Luxury + diaspora
Capital intensity	Very high	Medium	Low
Public mark	~$1.4bn	Private, <$50m e	Ask implies $52m

The acquisition logic is a gap in the Nigerian-owned stack. Transcorp and Ikeja Hotel capture branded rooms. Hotels.ng and Wakanow capture mass search. Nobody Nigerian-owned owns the escrow-backed luxury home — the product Airbnb runs globally and local operators run as WhatsApp. That gap is what US$47.2m is buying: brand, codebase, fee stack, and the right to put 2,200 verified homes on it by 2031 without building a Hilton.

Multiple check

Lens	Comp	On Jollof Y5	This ask
10× EBITDA	Profitable marketplace	₦151bn / $94m	50% → $47m cash
Asset-light vs hotel P/E	Transcorp ~102× earnings	Not used	Would be absurd
4× GMV	Growth marketplace	$311m	Ceiling, not the ask
Last Nigerian OTA round	Hotels.ng / Travelbeta	n.m.	Ask is 3–10× those marks
Implied close P / Y5 sales	Net rev ₦25.9bn	3.2× Y5 net rev at close EV	Discounted for risk

Sources for marks: Transcorp market cap, StockAnalysis / NGX as of 11 June 2026 and Nairametrics 17 March 2026 (₦2tn+); Transcorp and Ikeja Hotel H1 2026, BusinessDay 27 July 2026; Hotels.ng raise ~$11.7m PitchBook; Wakanow funding databases (treat as unverified); Travelbeta $2m seed, Techpoint 2015; Lagos short-let ₦281–286bn, Edala / BusinessDay March 2026. Jollof figures are from the companion projections PDF, not audited statements.

Strategic fits

Nigerian hotel group (Transcorp, Ikeja Hotel, independent groups).
Add a zero-inventory luxury channel without another tower. Aura-class OTA plus Jollof's escrow homes is a full funnel. The cash ask is ~3% of Transcorp's market cap.

Nigerian OTA (Hotels.ng, Wakanow, Travelbeta).
Move up-ADR. Mass hotel inventory does not monetise Ikoyi villas well. Buying Jollof is cheaper than convincing luxury hosts that an OTA will hold funds in escrow.

Bank / PSP / fintech.
Escrow, split pay, multi-currency and gift cards are already in the product. A payments owner turns float and acquiring into the P&L.

Family office / diaspora capital.
Hard-currency guest mix, Naira cost base, asset-light. The 10% founder roll keeps operators who know Lekki.

Regional strategic (Ghana, Kenya).
The Year-5 Accra line and Year-10 four-country map are the expansion thesis. Buying now is buying the Nigerian density required before Accra works.

What we will not do in this process: a slow minority round that reprices later; a brand licence without equity; or a fire-sale of the codebase without the operators. The 10% retain is the price of keeping the people who can hit 2,200 homes.

From this paper to an SPA

Week	Action
0	Term sheet on the 90/10, ₦75.5bn / US$47.2m cash structure
1–2	Exclusivity; data room (code, cap table, IP, contracts, projections model)
3–5	Confirmatory diligence (legal, tax, product, payments, FCCPC if needed)
6–7	SPA / SHA (board, reserved matters, lock-up, non-compete)
8	Closing: 90% cash; 10% holdback; share transfer; announcements
+12 mo	Holdback release; first locked founder liquidity window (2%) if agreed

What is in the data room

Full PHP/MySQL codebase and HostGator deployment; fee engine (Pricing.php); user, booking, escrow and audit schemas; the September 2026 projections and this proposal; cap table; trademarks and domain; material host/guest contracts if any; insurance and KYC process notes. Demo GMV in the admin UI is labelled as demonstration data and will not be represented as trailing revenue.

Walk-away and MAC

Material adverse change: loss of core IP, undisclosed tax or CBN enforcement that blocks escrow, or a trust incident that makes the brand unusable. Missed listing targets between signing and close are not a MAC — the buyer is underwriting the plan. If the buyer terminates without MAC after exclusivity, 1.5% of cash consideration is payable to the company for process cost.

The sentence we want signed

Buyer acquires 90% of Jollof Living for cash equal to 50% of the management-case Year-5 enterprise value (₦75.5bn / US$47.2m at ₦1,600), and founding shareholders retain 10% fully diluted ordinary equity, locked 36 months, with two buyer directors, one founder director, and one independent.

Luxury Living, African Soul
