

Jollof Living

Luxury Living, African Soul

Three-, five- and ten-year **Financial projections**

Marketplace · Lagos & Abuja, then West Africa
September 2026 · Figures in Nigerian Naira · USD at ₦1,600

Not an offer to sell securities. Forward-looking estimates only.

Purpose, method and supply targets

This memorandum translates the fee stack already encoded in the Jollof Living product — 12% host commission (hosts keep 88%), 8% guest service fee, 7.5% VAT collected and remitted, ₦15,000 cleaning pass-through, 20% security deposit held in escrow, weekly and monthly length discounts, experiences, gift cards, ₦10,000/₦10,000 referrals and an 8% affiliate commission — into a fundraising-grade three-horizon forecast.

The seed catalogue (12 residences) and the in-product admin badge of “₦412m GMV this month” are demonstration data, not trading history. Year 1 is calendar 2027, the first full operating year after a 2026 launch. USD equivalents use a constant planning rate of ₦1,600 = US\$1; they are not a CBN forecast.

Supply targets used in this pack (per instruction)

YEAR 3 · 2029

500 listings

Live, Jollof-verified homes

YEAR 5 · 2031

2,200 listings

Nigeria + Accra scale

YEAR 10 · 2036

4,500 listings

West African network

These listing counts are more aggressive than a cautious organic path. Occupancy and ADR are held to luxury-realistic levels so GMV does not scale 1:1 with vanity supply. VAT, cleaning fees and deposits are excluded from net revenue. Conservative / base / upside are shown at each horizon; narrative uses the base case.

Contents

- 08 Risks, governance and what must be true

Why this marketplace, why now

Luxury, not mass.

Jollof Living is built as the escrow-backed home for penthouses, villas and heritage stays in Lagos and Abuja — Ikoyi, VI, Lekki, Banana Island, Eko Atlantic, Maitama — not as a clone of mass Airbnb. Average daily rates in the live catalogue sit at ₦145,000–₦420,000.

Fees already in the product.

The 12% + 8% stack ($\approx 20\%$ of lodging before PSP) is live in code, invoices and host dashboards. We are not inventing a take-rate in this memo.

Trust is the moat.

KYC, in-person / video inspection, Jollof Verified badges, escrow released only after guest check-in, AI fraud flags and a 24/7 concierge are the reason a host accepts 12% and a guest pays 8%.

Naira rails, dollar guests.

Cards, transfer, USSD, Paystack, Flutterwave, Stripe, multi-currency display (NGN/USD/GBP/EUR) and long-stay split pay match how Nigerians and the diaspora actually book.

Second act is software.

From Year 4, host SaaS (calendar sync, dynamic pricing, channel manager) lifts blended take-rate without taxing the guest further.

Base-case snapshot

	Year 3	Year 5	Year 10
Live listings	500	2,200	4,500
Occupancy / ADR	55% · ₦215k	60% · ₦245k	64% · ₦310k
GMV	₦23.2bn · \$14.5m	₦124.5bn · \$78m	₦348bn · \$218m
Net revenue	₦4.65bn	₦25.9bn	₦76.0bn
EBITDA	₦1.60bn	₦15.1bn	₦31.5bn
Net income	₦1.12bn	₦10.8bn	₦22.0bn
EBITDA margin (on net rev.)	34%	58%	41%

A 3-night Instant Book at ₦185,000 ADR

Worked example using the server-side Pricing engine (Onyx-class penthouse, no add-ons, no promo). Cleaning and VAT are pass-through. Host WHT (~5%) is a host cost, not company revenue. PSP assumed 1.5% of guest collections once gateways are live.

Line	₦	Treatment
Lodging 3 × 185,000	555,000	GMV
Cleaning fee	15,000	Pass-through
Guest service fee 8%	44,400	Platform revenue
VAT 7.5%	46,080	Remitted to FIRS
Guest total (ex-deposit)	660,480	Collected
Host commission 12%	66,600	Platform revenue
Host payout 88%	488,400	Weekly escrow release
Platform revenue	111,000	20.0% of lodging
PSP 1.5% of guest total	(9,907)	Cost of net revenue
Contribution (pre-CAC)	~101,000	18.2% of lodging

Rule of thumb used in the forecasts: net take after PSP, before VAT/WHT, $\approx$ 17.5% of lodging GMV in Years 1–3, 18.5% by Year 5 as experiences attach, 19.5% by Year 10 with host SaaS. Experiences (lagoon cruise ₦85k, private chef from ₦55k) are modelled at a 25% platform take after operator payout. Length discounts (–12% weekly, –25% monthly) are already netted into ADR.

Revenue stack

Host commission 12%	Core. Defended; we do not buy supply by cutting it.
Guest service 8%	Concierge, escrow, support, app. Transparent at checkout.
Experiences 25% take	Chefs, cruises, spa — attach rate 8% → 32% over the decade.
Host SaaS	From Y4, ₦8k–₦25k per listing per month for tools already in the dashboard.
Corporate	5% of GMV in Y1 → 25% by Y10; longer stays, lower CAC, policy billing.

By Year 5, guest LTV on a loyal luxury traveller is ~₦535k versus ~₦12k CAC. Host LTV is an order of magnitude larger than ₦250–350k onboarding (photography, inspection, CSM). The constraint is verified supply quality, not paid acquisition.

Prove the machine — 500 live homes

Job: Lagos-Abuja density, live payments and escrow, incident rate <0.5%, EBITDA-positive.
Do not open a third country until occupancy holds above 50% in peak months.

	2027 Y1	2028 Y2	2029 Y3
Ending live listings	40	180	500
Occupancy	42%	50%	55%
ADR (after length mix)	₦185,000	₦200,000	₦215,000
Nights sold	6,130	32,850	100,375
Stay GMV	₦1.13bn	₦6.57bn	₦21.58bn
Experience GMV	₦0.05bn	₦0.42bn	₦1.55bn
Total GMV	₦1.41bn	₦7.20bn	₦23.15bn
GMV (USD)	\$0.9m	\$4.5m	\$14.5m
Net revenue	₦0.24bn	₦1.38bn	₦4.65bn
Gross profit	₦0.20bn	₦1.10bn	₦3.70bn
EBITDA	(₦0.03bn)	₦0.28bn	₦1.60bn
Net income	(₦0.04bn)	₦0.18bn	₦1.12bn

Year 1 remains a controlled loss: photography unit, KYC operations, PSP go-live. Year 2 turns EBITDA-positive on the original 180-home run-rate; Year 3's jump to 500 homes is a supply push (superhost programme, professional photography, Lekki/Ikoyi density) funded by a Series A, not by cutting take-rate. People scale to ~70 FTE by Y3. Affiliate + referral credits stay inside 8% of referred GMV.

Y3 P&L (base, ₦ million)

	Amount	% net rev.
Host commission	2,590	56%
Guest service fee	1,726	37%
Experiences take	388	8%
Other	46	1%
Net revenue	4,650	100%
PSP, affiliates, trust & fraud	(950)	20%
Gross profit	3,700	80%
People, marketing, tech, G&A	(2,100)	45%
EBITDA	1,600	34%
Tax (effective ~25%)	(400)	
Net income	1,120	24%

Category brand — 2,200 live homes

Nigeria remains 75%+ of GMV. Accra is live. Host SaaS is a real line.
Corporate mix 18% of GMV to flatten Detty December seasonality.

	Y3 2029	Y4 2030	Y5 2031
Live listings	500	1,100	2,200
of which Accra	0	80	350
Occupancy	55%	58%	60%
ADR	₦215,000	₦230,000	₦245,000
Nights sold	100,375	232,870	481,800
Stay GMV	₦21.6bn	₦53.6bn	₦118.0bn
Experience GMV	₦1.6bn	₦3.6bn	₦6.5bn
Total GMV	₦23.2bn	₦57.2bn	₦124.5bn
GMV (USD)	\$14.5m	\$36m	\$78m
Net revenue	₦4.65bn	₦11.4bn	₦25.9bn
Host SaaS	—	₦0.18bn	₦0.40bn
EBITDA	₦1.60bn	₦5.4bn	₦15.1bn
Net income	₦1.12bn	₦3.8bn	₦10.8bn

2,200 homes at Year 5 is a land-grab: roughly 4× the three-year base and equivalent to a dense luxury footprint across Lagos, Abuja, Port Harcourt and Accra. Occupancy is capped at 60% so the model does not assume every new key is filled. Channel manager (Airbnb / Booking.com / VRBO sync) is used to fill shoulder nights, not to become a channel reseller. Cumulative 2027–2031 GMV ≈ ₦210bn (~US\$131m); cumulative EBITDA ≈ ₦24bn.

Y5 NET REVENUE

₦25.9bn

≈ US\$16.2m · 20.8% of GMV

Y5 EBITDA

₦15.1bn

58% of net revenue · US\$9.4m

High Y5 EBITDA margin reflects marketplace operating leverage once photography and KYC are process, not art. If listing quality slips, occupancy — not opex — is the first thing that breaks; the conservative case (next section) cuts supply growth, not fees.

West African operating system — 4,500 homes

Nigeria profit engine. Ghana, Côte d'Ivoire and Kenya as growth.

Fractional / securities products are excluded until licensed.

	Y5	Y7	Y10
Live listings	2,200	3,200	4,500
Countries / cities	2 / 6	3 / 9	4 / 12
Occupancy	60%	62%	64%
ADR	₦245,000	₦275,000	₦310,000
Nights sold	481,800	724,000	1,051,200
Stay GMV	₦118bn	₦199bn	₦326bn
Experience GMV	₦6.5bn	₦13bn	₦22bn
Total GMV	₦124.5bn	₦214bn	₦348bn
GMV (USD)	\$78m	\$134m	\$218m
Net revenue	₦25.9bn	₦44bn	₦76.0bn
of which SaaS / tools	₦0.4bn	₦1.8bn	₦4.5bn
EBITDA	₦15.1bn	₦21.5bn	₦31.5bn
EBITDA margin	58%	49%	41%
Net income	₦10.8bn	₦15.1bn	₦22.0bn
FTE	120	175	240

Margin compresses from Y5 to Y10 as multi-country compliance, brand and concierge scale. That is intentional: we would rather hold luxury NPS than run a 60% EBITDA story on neglected markets. Cumulative 2027-2036 GMV $\approx$ ₦1.55tn (~US\$0.97bn, undiscounted Naira-nominal). At an 18% Naira discount rate, Year-10 EBITDA of ₦31.5bn is still a substantial franchise if trust holds.

Illustrative enterprise value (not an offer)

	Y3	Y5	Y10
EBITDA (₦bn)	1.60	15.1	31.5
EV at 10× EBITDA (₦bn)	16	151	315
EV (US\$m)	~10	~94	~197
EV at 4× GMV (US\$m)	~58	~311	~870

Raise on Year-3 GMV quality (repeat rate, verified supply, incidents), not on Year-10 GMV. Early EV is option value on execution. Mass-market comps (3-6× GMV) overstate us if we stay luxury-narrow; profitable marketplace comps (10-18× EBITDA) are the better lens from Year 5.

Range, float and use of funds

Horizon exits

	Conservative	Base	Upside
Y3 listings / GMV	280 · ₦11bn	500 · ₦23bn	700 · ₦34bn
Y3 EBITDA	₦0.35bn	₦1.60bn	₦2.6bn
Y5 listings / GMV	1,100 · ₦55bn	2,200 · ₦125bn	3,000 · ₦175bn
Y5 EBITDA	₦4.2bn	₦15.1bn	₦23bn
Y10 listings / GMV	2,400 · ₦160bn	4,500 · ₦348bn	6,500 · ₦520bn
Y10 EBITDA	₦12bn	₦31.5bn	₦52bn

Capital plan (base)

2026 friends-and-family ₦180m to finish payments, KYC and the first 25 homes. 2027 seed ₦1.2bn (~US\$0.75m) for the photography unit and guest CAC. 2029 Series A ₦8.0bn (~US\$5.0m) to underwrite the 500-home Year-3 target and Accra. 2032 Series B ₦24bn (~US\$15m) only if multi-country cash conversion lags; the base case can fund Y5-Y10 from operations after A. Escrow is guest-funded. Weekly host payouts versus capture-at-booking create 7-14 days of positive float — not spendable operating cash. Client money is segregated.

Use of Series A (illustrative)

Use	₦bn	Why
Verified supply	3.2	Inspections, photography, host CSM to 500 then 2,200
Trust & payments	1.1	PSP, escrow ops, insurance float, fraud
Demand	1.8	Brand, Dettty December, diaspora, corporate sales
Product & AI	0.9	App, locks, concierge, channel manager
Accra launch	0.6	Entity, people, first 80-100 homes
Reserve	0.4	18-month runway buffer
Total	8.0	

Sensitivity at Year 5 base: occupancy -8 pts $\approx$ EBITDA -28%; ADR -10% $\approx$ -22%; take-rate -2 pts $\approx$ -18%; listings -20% $\approx$ -24%. Naira -30% vs USD leaves Naira P&L intact and cuts USD EBITDA 30%. Biggest lever is live verified listings $\times$ occupancy.

What must be true

Naira path

ADR is Naira-quoted. Report and raise in both NGN and USD.

Supply quality at 500 then 2,200

If verification slips, the brand dies. Cap monthly listings onboarded to inspection capacity.

Airbnb price war

Defend with escrow and concierge. Do not cut the 12%.

Payments / CBN

Escrow via licensed PSP partners; no assumption of a bank licence.

Seasonality

Detty December can exceed 30% of annual GMV without corporate and long-stay mix.

Trust event

One safety failure can freeze supply for a year — the conservative case.

Execution of 4,500 keys

This is a land-grab. Governance, IFRS and a published annual trust report are non-negotiable from Year 3.

Milestones

End Y1 Live Paystack/Flutterwave + real escrow; ≥ 40 verified homes; $\geq 4.8\%$; EBITDA loss $< \text{₦}50\text{m}$.

End Y3 500 homes; occupancy $\geq 55\%$; repeat guests $\geq 20\%$ of nights; EBITDA $\geq \text{₦}1.5\text{bn}$.

End Y5 2,200 homes; Accra $\geq 15\%$ of GMV; SaaS live; net take $\geq 18\%$; category brand in Lagos luxury.

Y10 4,500 homes across four countries; still luxury-narrow; net revenue $\geq \text{₦}70\text{bn}$; independent board, IFRS, segregated client money.

Method: catalogue ADR, 12%/8%/7.5%/₦15k cleaning/20% deposit/88% host payout/8% affiliate/experience prices are taken from the Jollof Living application. Listing counts in this pack are the investor targets you set. Occupancy, CAC and headcount are management assumptions for a post-launch luxury marketplace, not historicals. Tax simplified at 25% effective from first profit year.
